PROFILE

Junior Full Stack Developer focused on building complete, **production-ready** applications with modern **TypeScript**, **React** and **Node.js**, working across **frontend** and **backend**. Currently seeking an internship/entry-level position in a team that values quality, learning, and long-term growth.

PROJECTS

AppointMe | [Source Code](#) | [Live Demo](#)

Next.js | **TypeScript** | **React**

- **Role-Based Architecture:** Engineered a **full-stack** appointment platform featuring a dual-role onboarding system (Provider/Client) with custom middleware to enforce secure access control and prevent unauthorized role-switching.
- **Type-Safe Data Modeling:** Architected a relational schema using **Drizzle ORM** and **PostgreSQL**, utilizing enums and strict **TypeScript interfaces** to eliminate runtime data errors and maintain 100% schema consistency.
- **Secure Asset Management:** Optimized performance and security by implementing **AWS S3** file uploads via **pre-signed URLs**, reducing server-side load and ensuring private data handling.

Workout Tracker | [Source Code](#) | [Live Demo](#)

React | **Node.js** | **MongoDB**

- **Dynamic UI/UX:** Developed a highly interactive frontend in **React** that allows users to log workouts dynamically, featuring a backend-driven exercise library categorized by muscle groups.
- **RESTful API:** Built full **CRUD** operations for workouts using **Express.js** and storing them in **MongoDB**.
- **Responsive Design:** Ensured usability across devices with **mobile-friendly layouts** and adaptive components.

EDUCATION

2024 – Present **TQ UK Level 6 Diploma**
(Expected 2026) Web Developer/Designer

Greece, SKG

2024 – Present **Σ.Α.Ε.Κ ΔΕΛΤΑ 360**
(Expected 2026) Web Developer/Designer

Greece, SKG

Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Operating Systems, Data Communications, Object-Oriented Programming, Databases.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, C, C++, PHP.

Developer Tools: AWS, Postman, Git, GitHub.

Libraries/Frameworks: React, Node.js, Express.js, Next.js, TailwindCSS.

Databases: MongoDB, Firebase, SQL, PostgreSQL.

CERTIFICATIONS

2025 React - The Complete Guide 2025 (incl. Next.js, Redux)

Udemy

Skills: React, Redux, Context API, State Management, Next.js, Custom Hooks.

2024 The Complete 2024 Web Development Bootcamp

Udemy

Skills: HTML5, CSS, JavaScript, jQuery, Responsive Web Design, Bootstrap, Node.js, Express.js, MySQL, PostgreSQL, Authentication & Security, Version Control with Git & GitHub, React.
